Our professions

Roofing : Combining art and technology

The finishing touch of the building process, roofing is part of the aesthetics and harmony of both new and old buildings. Roofing services must not only protect buildings to ensure lasting quality, but also provide or preserve the identity of the built heritage.

Plumbing : Fluid transmission in total safety

The scope of application of plumbing is extremely wide. Lagrange and its subsidiaries carry out all kinds of work, from the simplest to the most complex.

Waterproofing : Performance

The BUILDING Division implements and guarantee total waterprproofing of their work in strict compliance with the aesthetics and quality of the buidling (e.g. Creating new higher performing products such as resins and PVC membrances).

Environmental engineering : Water, air, heat and cold at the service of comfort

The wide range of skills of our teams enables us to operate in the most diverse areas, from private to major units:

- >Renovation
- >Energy saving
- >Rehabilitation
- >Work in conservation areas
- >New work

Painting and coatings : A comprehensive knowledge of building trades

Specialists in coatings, interior and exterior paints, new and renovation since 1977, the JEAN LETUVE PAINTING subsidiary of the TFN Group offers expertise in traditional paint application processes with systems suited to different types of support.

Masonry : The art of diversity

BATIMMO, a subsidiary of the BUILDING Division, operates in the following sectors of activity :

- >Fitting out appartments
- >Masonry work
- >Tiled floor laying
- >Marble floor laying
- >Maintenance of building halls and ceilings
- >Roof maintenance
- >Plumbing

Partitioning

O2TL combines creativity with exactitude in developing your premises according to your wishes. Transforming your premises means adapting your workspace to your new requirements. O2TL, aware of your installation constraints and your image and comfort demands, provides you with solutions at every stage in your installation process.

- >Demolition and preparation for new job sites
- >Complete development
- >Renovation

Quality

The TFN Group is committed to a quality approach through different certifications that respond to the limitations of our trades. The Building Division is characterised by its comprehensive technological expertise and by its specialist and motivated teams. Our quality commitment is validated by Qualibat 2007 certificates awarded to the Lagrange and Jean Létuvé companies..
