

Parks & Gardens Division

New work & maintenance

More than a century's worth of experience in France, a palette of know-how combining the creation, management and technical skills of our teams. We are able to lay out and maintain the landscapes of today's world.

Be they of natural or artificial origin, our landscape designs are constantly evolving. Conscious of this diversity, we undertake to accompany our customers down a quality route which embraces both the art of landscaping (sensitive) and professionalism (technical). We create and rehabilitate natural and urban areas.

We are involved in landscaping and managing the environmental heritage by combining the know-how and competencies of our plant and landscaping specialists.

Know-how

Imagining, creating, looking after and maintaining landscaped areas: these are the activities for which we guarantee high quality delivery.

Knowing and understanding natural environments and their components enables us to contribute to the completion, follow-up and implementation of a variety of projects :

- > Rehabilitation
- > Creating and performing the upkeep of parks and gardens, golf courses, sports surfaces and play areas
- > Preservation of biodiversity by employing vegetation-specific management techniques

With the support and input from specialist and experienced professionals, we are able to respond to our customers' needs and accompany them in their thinking on a long-term basis.
