

Hygiène Division

Maintenance & services

Fort de nombreuses années d'expérience, le Pôle Hygiène du Groupe TFN regroupe des équipes de spécialistes. A l'écoute de ses clients : entreprises, collectivités et gestionnaires d'immeubles, les hommes et les femmes du Pôle Hygiène, ont développé des expertises techniques dans les domaines du traitement anti-parasitaires, de l'hygiène de l'air et de l'assainissement.

Managing the sites and installations entrusted to us by our customers imposes a substantial number of constraints and obligations :

- > Health risks (insects, rodents and infections etc...)
- > To avoid any negative impact on our customers' public image
- > To provide total traceability of our services and exhaustive communication to our customers (written reports, computerised reporting)
- > To meet our customers' requirements for internal and external audits
- > To respect environmental constraints by adapting the chemical solutions employed to the biocide directives

The reactivity and proximity of the TFN Hygiene teams are the cornerstone of our customer-facing Quality approach.

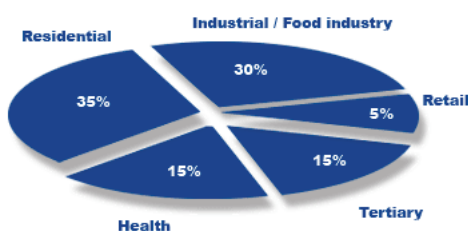

A complete range of hygiene and made-to-measure services performed by qualified professionals :

- > Ministry of agriculture accreditation
- > Member of the 3D professional association
